- The wheels and tyres fitted to this vehicle, must conform to the specifications of the vehicle manufacturer's original equipment. This will help to enhance the performance of the traction devices. See **236, TYRE MARKINGS**.
- Do not fit a traction device to a temporary-use spare wheel.
- Fit traction devices in pairs, on the same axle.
- Always read, understand, and follow the traction device manufacturer's instructions. Pay particular attention to the maximum speed and fitting instructions.
- Avoid tyre/vehicle damage, by removing the traction devices as soon as the conditions allow.

Note: *When using snow chains, select Winter driving mode and switch DSC off. See* ***145, WINTER*** *and* ***111, SWITCHING DSC OFF****.*

TYRE DECLARATION (India only)

All imported tyres meet the requirements of Bureau of India Standards (BIS) and comply with the requirements under Central Motor Vehicle Rules (CMVR) 1989. The tyres are the same as those tyres supplied as Original Equipment (OE) for Jaguar models which are fully Type Approved for the Indian market.
