

Stability control

JAGUARDRIVE CONTROL SCENARIOS

The table below gives examples of the rotary drive control settings suggested for different driving scenarios.

Scenario	Suggested driver selection			
	Tyre fitment	Rotary Drive Control	Dynamic Stability Control (DSC)	Transmission
Wet grass	Standard tyres	Winter mode	Default (On)	Drive (D)
Very wet tarmac roads				Sport (S) + Manual
Ice/light snow	Standard or All Season tyres			Drive (D)
Snow ploughed hard-topped roads (including black ice)	All Season tyres			
Packed snow roads	Winter tyres			
Deep fresh snow	Snow chains			
Normal driving conditions (e.g. dry tarmac roads, town driving, cruising etc.)	Standard tyres	No driver selection required. Special modes off.	Dynamic mode	Drive (D)
Overtaking on a dry road				Drive (D) or Sport (S)
Pulling out onto a busy road in dry conditions				
Favourite country lane (public road)				Sport (S) or Sport (S) + Manual
Private track/race day			TracDSC (where conditions permit)
