## Voice Control System

## REDIALLING

The commands
>>Phone<<
>>Redial<<
dial the telephone number last used.

## Command list

| User command | System response |
| :--- | :--- |
| Phone | Phone |
| Redial | Confirm Yes or No |
| Yes | Dialling |

## STORING A TELEPHONE NAME/NUMBER

Telephone numbers which you dial frequently can be stored in the Voice Recognition phone directory in conjunction with the contact's name.

## Storing via voice command

The command
>>Phone<<
>>Store name<<
starts the dialogue for storing a name. The name is entered first, then the number.
The same rules for saying numbers apply as for dialling a number.

If possible, keep names acoustically distinct from one another, for example, "Andrew Royd" and "David Royle" instead of "Mr Royd" and "Mr Royle". This will improve recognition when you make a call.

Depending on the spoken length of the names and numbers you have entered, it is possible to store approximately 20 entries.

## Command list

| User command | System response |
| :--- | :--- |
| Phone | Phone |
| Store name | Name please |
| Andrew Royd | Andrew Royd <br> Storing name <br> Number please |
| Zero, one, six, one | Zero, one, six, one, continue? |
| Four, nine, six | Four, nine, six, continue? |
| Zero, nine, nine, eight | Zero, nine, nine, eight, continue? |
| Store | Number Stored |
