DIALLING A PHONE NUMBER

Starting a dialogue

Activate voice control by pressing and releasing the 'Telephone/Voice recognition' switch, an audible signal is heard (the audio system will mute if switched on).

The commands
>>Phone<<
>>Dial number<<
start the dialogue for entering a telephone number. You are guided through this process by a pre-defined dialogue.

Saying numbers

The system understands single digits from zero to nine. You must use
>>Zero<<
not
>>Oh<<.

Numbers such as ten, eleven, twelve etc. are not recognised.

To speed up input it is a good idea to group together between three and five digits into a continuous string. However, you can also say each digit individually, or all digits continuously.

Note: *Telephone numbers of up to 20 digits are acknowledged. If a longer number is given, the following error message will be issued:* ***>Number too long<****.*

Establishing a connection

The command **>>Dial<<** terminates input of the digits and establishes a connection.

Note: *To make a foreign phone call say* ***>>Plus<<*** *followed by the country code.*

Command list

User command	System response
Phone	Phone
Dial number	Number please
Zero, one, six, one	Zero, one, six, one, continue?
Four, nine, six	Four, nine, six, continue?
Zero, nine, nine, eight	Zero, nine, nine, eight, continue?
Dial	Dialling

Voice Control System

Correcting/Deleting & Cancelling inputs

When you are entering digits into the system, it will repeat back the numbers given, then asks you to continue. You may continue entering digits to complete your number or if you have made a mistake or if the voice control has misunderstood, you may say:
>>Correction<<, **>>Delete<<** or **>>Cancel<<**.

Correcting inputs

>>Correction<<
to delete the last block of digits.

After the command **>>Correction<<**, the system repeats the digits that were entered correctly up to that point.

Deleting inputs

>>Delete<<
deletes all digits entered.
It is then necessary to enter the digits again from the very beginning

Cancelling voice session

>>Cancel<<
terminates voice session.

Command list

User command	System response
Phone	Phone
Dial number	Number please
Zero, one, six, one	Zero, one, six, one, continue?
Four, nine, six	Four, nine, six, continue?
Correction	Zero, one, six, one, continue?
Four, nine, five	Four, nine, five, continue?
Delete	Number please
