for the duration of the announcement.

Note: *The Alarm announcements type, broadcasts information concerning crises of national or international importance.*

Also in **Options**: activate/deactivate **FM Traffic** and **Link DAB** and scroll down to alter **DAB country** and **DAB format** settings (with vehicle stationary).

8. **DAB search**: Touch to access the following:
   - **Auto-tune**: Select to start automatic tuning and build a list of all the digital ensembles and channels available in your region.

     During **Auto-tune**, a pop-up shows tuning progress.

     To update the list when you move to another region, select **Auto-tune** again. You can also add local channels as presets to minimise the need for auto-tuning as you move locations.
   - **Ensemble list**: Select to display a list of all available ensembles. Select an ensemble name to display a list of channels in that ensemble. Select a channel name to tune that channel.
   - **Channel list**: Select to display a complete list of all channels in all available ensembles. Select a channel name to tune that channel.
   - **Subchannel list**: Select to display a list of any subchannels available for the currently tuned channel.
   - **PTY**: Channels are categorised by the broadcaster as belonging to a programme type (PTY) category.

     Select to display a list of PTY categories that contain channels. Select a PTY category to display a list of channels in that category. Select a channel name to play that channel.

     Briefly touch one of the seek buttons repeatedly during the first 10 seconds of broadcast, to cycle through all channels in the PTY category that you chose.
   - **Channel data**: Select to display technical data relating to the currently tuned channel.
9. Station presets: Each DAB band has 6 preset positions.
   - Touch and release to tune the radio to the station stored on that preset.
   - Touch and hold to store the current station on that preset (the radio will mute while the station is stored).
   - Use the seek buttons on the steering wheel to select the next or previous preset station.

   Note: *If you attempt to select a preset channel that is now unavailable or invalid,* ***No reception*** *is displayed.*
10. Text transmitted by DAB channels. Touch the adjacent arrow to view the complete message as a pop-up.

    Briefly touch the pop-up to remove it.

DIGITAL RADIO RECEPTION

DAB radio can significantly increase the number of radio channels/stations available. The DAB signals are transmitted to most major cities, towns and motorway networks.
