

SEAT BELT SAFETY

-  Care should be taken to avoid contamination of the webbing with polishes, oils and chemicals, and particularly battery acid. Cleaning may safely be carried out using mild soap and water.
-  The belt should be replaced if webbing becomes frayed, contaminated or damaged.
-  It is essential to replace the entire assembly after it has been worn in a severe impact, even if damage to the assembly is not obvious.
-  Do not carry hard, fragile or sharp items between your person and the seat belt.
-  Seat belts should be worn by all vehicle occupants, for every journey, no matter how short.
-  When using seat belts to restrain items other than occupants, take care to ensure that the belts are not damaged, or exposed to sharp edges.
-  No modifications or additions should be made by the user which will either prevent the seat belt adjusting devices from operating to remove slack, or prevent the seat belt assembly from being adjusted to remove slack.
-  The use of comfort clips, or devices that would create slackness in the seat belt system, is not advised.

SEAT BELT CHECKS

Note: If the vehicle is parked on an incline, the seat belt mechanism may lock. This is a safety feature and the belt should be gently eased out from the upper anchorage.

The seat belts should be inspected regularly to check for fraying, cuts or wear to the webbing, and the condition and security of the mechanism, buckles, adjusters, and mounting points.

- With the seat belt fastened, give the webbing near the buckle a quick upward pull. The buckle must remain securely locked.
- With the seat belt unfastened, unreel the seat belt to the limit of its travel. Check that it unreels smoothly with no snatches or snags. Allow the belt to fully retract, again checking for smooth operation.
- Partially unreel the seat belt, then hold the tongue plate and give a quick forward pull. The mechanism must lock and prevent any further unreeling.

If any of the seat belts fail to meet these criteria, immediately contact your Dealer/Authorised Repairer.
