

# Stability control

## JAGUARDRIVE CONTROL SCENARIOS

The table below gives examples of the rotary drive control settings suggested for different driving scenarios.

Scenario	Suggested driver selection			
	Tyre fitment	Rotary Drive Control	Dynamic Stability Control (DSC)	Transmission
<b>Wet grass</b>	Standard tyres	Winter mode	Default (On)	Drive (D)
<b>Very wet tarmac roads</b>				Sport (S) + Manual
<b>Ice/light snow</b>	Standard or All Season tyres			Drive (D)
<b>Snow ploughed hard-topped roads (including black ice)</b>	All Season tyres			
<b>Packed snow roads</b>	Winter tyres			
<b>Deep fresh snow</b>	Snow chains			
<b>Normal driving conditions (e.g. dry tarmac roads, town driving, cruising etc.)</b>	Standard tyres	No driver selection required. Special modes off.	Drive (D)	Drive (D)
<b>Overtaking on a dry road</b>				Drive (D) or Sport (S)
<b>Pulling out onto a busy road in dry conditions</b>				Drive (D) or Sport (S)
<b>Favourite country lane (public road)</b>				Sport (S) or Sport (S) + Manual
<b>Private track/race day</b>				TracDSC (where conditions permit)
