

## CHILD SEAT POSITIONING

Information given within the table is correct at the time of going to press. However, availability of child restraints may change. Please consult your Dealer/Authorised Repairer for the latest recommendation.

**Note:** The information contained in the following table may not be applicable to all countries. If you are in any doubt regarding the type and fitment of child seats seek advice from your Dealer/Authorised Repairer.

Seating position	Mass group				
	<b>0</b> = Up to 10 kg (22 lb.) 0-9 months	<b>0+</b> = Up to 13 kg (29 lb.) 0-18 months	<b>I</b> = 9 to 18 kg (20-40 lb.) 9 months to 4 years	<b>II</b> = 15 to 25 kg (33-55 lb.) 4-9 years	<b>III</b> = 25 to 36 kg (55-80 lb.) 8-12 years
Front passenger*	<b>U</b>	<b>U</b>	<b>U</b>	<b>U</b>	<b>U</b>

**U** = Suitable for universal category restraints approved for this mass group.

\* Always ensure that the passenger airbag has been disabled before using a child restraint in this seating position. The seat back needs to be adjusted to the fully upright position.

**Note:** Ages given are approximate. In case of doubt, the child's weight, not age, should be used when considering an appropriate child seat.
