## Radio

- 8. Frequency input: Select to enter a known frequency of a station on the current waveband, using the numeric keypad that appears. Select OK or wait for 2 seconds to tune to the entered frequency.
- **9. Station presets**: Each waveband has 6 preset positions.
  - Touch and release to tune to the station stored on that preset.
  - Touch and hold to store the current station on that preset (the radio will mute while the station is stored then a double-tone will sound).
  - Use the seek buttons on the steering wheel to change to the next or previous preset station.

## RADIO DATA SYSTEM (RDS)

Your radio is equipped with RDS which enables the audio unit to receive additional information with normal FM radio signals.

**Note:** Not all FM radio stations broadcast RDS information.

Select **Settings** to view or alter RDS settings.

- Traffic/News: Provides local travel or news information.
- Regionalisation (REG): Select to prevent the radio tuning into an alternative local station that has a stronger signal.
- Alternative Frequency (AF): Select to allow the radio to automatically re-tune to a stronger alternative frequency for the current station. This is useful on a journey where the vehicle travels through different transmitter areas.
