LUGGAGE DIVIDER

For Sportbrake models, a luggage divider kit is provided to assist with safely securing items of

luggage to the loadspace floor.

Luggage compartment

Floor mounted luggage rails provide a full width mounting channel that will accommodate a flexible retracting band and/or a solid telescopic divider to retain soft and hard luggage of all shapes and sizes.

- 1. Press and pull to adjust length required of retracting band.
- 2. Adjust divider to length required.
- 3. Unlock required lashing eye, attach the luggage band/divider to lashing eye.
- With the lashing eye in the unlocked position, press the switch and slide to the required position in the luggage rail.
- **5.** Lock lashing eye when in required position.
- **6.** To remove luggage band/divider from lashing eye, unlock lashing eye and press the lock/unlock switch and release.
