

USING SNOW CHAINS

Only use traction devices in heavy snow conditions, on hard road surfaces.

Dynamic Stability Control (DSC) must be switched off when using traction devices.

Never exceed 50 km/h (30 mph) when traction devices are fitted.

Never fit traction devices to a temporary use spare wheel.

Jaguar approved traction devices may be used to improve traction on a hard road surface in heavy snow conditions.

If it becomes necessary to fit traction devices, the following points must be observed:

- Only Jaguar approved traction devices should be used on the vehicle. Only Jaguar approved traction devices have been tested to ensure that they do not cause damage to the vehicle. Contact your Dealer/Authorised Repairer for information.
- The wheels and tyres fitted must conform to the specifications of the original equipment.
- Full chain traction devices can be fitted to only the rear wheels.
- Do not fit a traction device to a temporary use spare wheel.
- Fit traction devices in pairs on the same axle.
- Always read, understand and follow the traction device manufacturer's instructions. Pay particular attention to the maximum speed and fitting instructions.
- Avoid tyre/vehicle damage, by removing the traction devices as soon as the conditions allow.

Note: When using snow chains, select Winter mode and switch DSC off.

TYRE DECLARATION (India only)

All imported tyres meet the requirements of Bureau of India Standards (BIS) and comply with the requirements under Central Motor Vehicle Rules (CMVR) 1989. The tyres are the same as those tyres supplied as Original Equipment (OE) for Jaguar models which are fully Type Approved for the Indian market.
