AIRBAGS AND ACTIVE HEAD RESTRAINTS

- **1.** Airbag warning information is printed on the driver and passenger sun visors.
- Both front seats are equipped with Active Head Restraints (AHR), which reduce the risk of neck and spinal injury (whiplash) in the event of a rear impact, by moving the head restraint upwards and forwards, supporting the occupant's head.

After activation, the whiplash protection mechanism resets automatically and does not need to be replaced.

- 3. The curtain airbags may deflate at a slower rate than the front or side airbags, to afford prolonged protection.
- 4. Seat mounted side airbags.
- 5. Front passenger airbag.
- 6. Driver's airbag.

Note: The general location of airbags fitted to the vehicle are marked by the word AIRBAG.
