

DAB RADIO SETTINGS

In **Settings**:

- If the **Link DAB** setting is switched on and the signal strength for a channel falls below an acceptable level, the audio unit will automatically search other available ensembles for a channel with the same name.

If an alternative local channel is found, the new channel is played automatically after a few seconds. If the channel is not found after a few seconds, the message **No reception** is displayed.

The word **Link** is displayed at the top of the touch screen when **Link DAB** is enabled.

- Select **DAB country** if driving into another country. Scroll through the country options to choose the appropriate one. This will prompt an auto-tune.

***Note:** This option is disabled while the vehicle is moving.*

- Choose **DAB format** if moving to a region that uses a different digital band. Available formats are:

- L Band.
- Band III.
- L Band & Band III.
- L Band Canada.
- L Band Can & Band III.

This will prompt an auto-tune.

***Note:** This option is disabled while the vehicle is moving.*

If reception is lost when the vehicle is in motion, the vehicle may be out of range of the ensemble. To build a new list of ensembles, select **Auto-tune**.

ENSEMBLES

Unlike AM/FM radio, DAB transmits several channels/stations on a single frequency. A group of channels is known as an ensemble. Some channels within the ensemble may have subchannels offering several listening options.
