

Starting the engine

STARTING THE ENGINE

 **Never start the engine, or leave it running, when the vehicle is in an enclosed space. Exhaust gases are poisonous and can cause unconsciousness and death if inhaled.**

 If the engine fails to start, do not continue cranking as this will discharge the battery. It may also damage the catalytic converter due to unburnt fuel passing through the exhaust.

Note: *The Smart key may not be detected if it is placed within a metal container, or if it is shielded by a device with a back-lit LCD screen such as a smart phone, laptop (including laptop bag), games console etc. Keep the Smart key clear of such devices when attempting Keyless entry or Keyless starting.*

To start the engine

E142752

1. Make sure that a valid Smart key is inside the vehicle.
2. Make sure that transmission **P** or **N** is selected.
3. Firmly depress the brake pedal.
4. Press and release the engine **START/STOP** button.

Once the engine has started, the brake pedal can be released, if it is safe to do so.

SWITCHING OFF THE ENGINE

The engine can be switched off while the vehicle is stationary, or while it is moving.

While the vehicle is stationary:

1. Make sure that the vehicle is parked with transmission **P** selected and the EPB applied.
2. Press and release the engine **START/STOP** button.

While the vehicle is moving:

-  It is not advisable to switch off the engine while the vehicle is moving. However, if a situation arises where engine switch off is urgent, the following procedure applies:
1. Press and hold the engine **START/STOP** button for 2 seconds, or;
 2. Press and release the engine **START/STOP** button twice within 2 seconds.

SWITCHING ON THE IGNITION

E142753

To switch on the ignition without starting the engine

1. Make sure the brake pedal is not depressed and that a valid Smart key is inside the vehicle.
2. Press and hold the engine **START/STOP** button until the warning lamps illuminate.
3. Release the engine **START/STOP** button.
