

Child restraint anchorages are designed to withstand only those loads imposed by correctly fitted child restraints. Under no circumstances are they to be used for adult seat belts, harnesses or for attaching other items or equipment to the vehicle.

CHILD SEAT POSITIONING

Information given within the table is correct at the time of going to press. However, availability of child restraints may change. Please consult a Dealer/Authorised Repairer for the latest recommendation.

Seating position	Mass group				
	0 = Up to 10 kg (22 lb) 0-9 months	0+ = Up to 13 kg (29 lb) 0-18 months	I = 9-18 kg (20-40 lb) 9 months to 4 years	II = 15-25 kg (33-55 lb) 4-9 years	III = 22-36 kg (49-80 lb) 8-12 years
Front passenger*	X	X	UF	U	U
Rear seats	U	U	U	U	U

- **U** = Suitable for universal category restraints approved for use in this mass group.
- **UF** = Suitable for forward-facing universal category restraints approved for use in this mass group.
- **X** = Seat position not suitable for children in this mass group.

* Jaguar recommend that the front passenger seat be positioned fully rearward, with the cushion adjusted to the highest position when installing child restraints in this position.

Note: The information contained in the following table may not be applicable to all countries. If you are in any doubt regarding the type and fitment of child seats, seek advice from a Dealer/Authorised Repairer.

Note: The legislation which governs how and where children should be carried when travelling in a vehicle, is subject to change. It is the responsibility of the driver to comply with all regulations in force.

Note: Ages given are approximate. In case of doubt, the child's weight, not age, should be used when considering an appropriate child seat.

Crash statistics show that children are safest when properly restrained in a child or infant restraint system that is secured in a rear seating position.
