Towing

- Make sure that a suitable breakaway cable or secondary coupling is used. Refer to the trailer manufacturer's instructions for guidance.
- Make sure that the tow ball is secure.
- Check the operation of all trailer lights.

Australia only:

Nose weight must be a minimum of 7% of gross caravan/trailer weight, up to a maximum of 150 kg (330 lb).

TRAILER ELECTRICAL CONNECTION

(!)

Attach only approved electrical connectors, which are in good condition, to the trailer socket.

The vehicle connector provides a 5 amp output which must not be exceeded. An accessory harness kit increasing output to 15 amp is available from a Dealer/Authorised Repairer.

When a trailer's electrical connection is made and the vehicle's direction indicators are used, the trailer warning indicator will flash in time with the direction indicators. See **49, TRAILER DIRECTION INDICATORS (GREEN)**.

TRAILER STABILITY ASSIST (TSA)

When a trailer is attached, TSA will automatically detect when a trailer sway is developing. It will then gradually reduce vehicle speed by cutting engine power and applying the brakes to help regain control.

HITCH GUIDANCE

Hitch guidance is a user selectable Touch screen feature that can aid the process of guiding the vehicle to a trailer tow hitch. Use Hitch guidance while reversing the vehicle to a trailer hitch.

Proceed as follows:

- 1. Select reverse gear. Dependent on the vehicle's specification, the Touch screen will automatically display selectable icons or a menu list. See 114, SURROUND CAMERA SYSTEM or see 105, REAR CAMERA.
- 2. Touch the Rear camera system's Hitch guidance icon or the Surround camera system's Hitch guidance tick, on the Touch screen to enable the Hitch guidance lines to be displayed.
- 3. Reverse the vehicle towards the trailer.
- As the vehicle closes to within 600 mm (2 ft) of the trailer tow hitch, an automated zoom feature is operated to enlarge the view.
- 5. Continue the manoeuvre carefully until the vehicle and trailer are as close as required.

TOW ASSIST

E134952

Note: Tow assist requires a connected trailer to be fitted with a tracking target sticker, which **must** be attached according to specific instructions. Ask your Dealer/Authorised Repairer for details.

Note: This feature may not operate with all trailer designs.

Tow assist aids trailer reversing, by displaying guidelines on the Touch screen.

Tow assist becomes active when a trailer/caravan is attached to the vehicle and the trailer's electrical plug is attached to the vehicle's socket.
