

Routine services

MAINTENANCE REQUIREMENTS

Routine services must be carried out throughout the life of the vehicle.

Some XJ, XF and XK models have a Service Interval Indicator in the instrument panel.

When a service is required, **SERVICE REQUIRED** will be illuminated when the starter is turned on. Depending on the type and style of driving that the vehicle is subjected to, the indicator may display a service message at a shorter distance than shown in the Service Interval Plans.

Not all markets have the Service Interval Indicator activated.

Service intervals shown in the Service Interval Plans are only nominal. The vehicle message centre will display actual distances to the next service.

On completion of a service, the message centre countdown feature will be reset.

Arduous Conditions servicing schedules are not displayed in the message centre.

For vehicles without a Service Interval Indicator, services should be at the distance or time based interval (whichever occurs first) shown in the Service Interval Plans.

Service content

The precise content of each service will vary from model to model and also according to the age of the vehicle, the distance it has travelled and whether an arduous service is applicable. The service operations applicable to your vehicle are listed on the Maintenance Check Sheet used by your Dealer/Authorised Repairer.

Note: *Some service providers may use their own check sheet with differing levels of service operations. It is usual that the highest level will match Jaguar Cars Limited requirements.*

Service Interval Plans

References **A** and **B** relate to the type of service required at that distance/time.

Owner maintenance

In addition to the routine services and inspections, a number of simple checks must be carried out more frequently.

These owner checks are listed in the **Maintenance** section of your Owner's Handbook. Fluid specifications and capacities are also listed in the Owner's Handbook.

REPLACEMENT

Routine services

Fluid replacement

Brake fluid and engine coolant (antifreeze and water solution) must be completely replaced at specific intervals. See the table below.

Your Dealer/Authorised Repairer will replace the fluids at the scheduled service.

Note: Replacement of fluids is subject to extra labour and material cost.

	Brake fluid replacement interval	Coolant replacement interval
XJ, XK	Every 2 years regardless of distance	Every 10 years or 150,000 miles / 240,000 km
XF	Every 3 years regardless of distance	Every 10 years or 150,000 miles / 240,000 km

Some brake system components may also need to be replaced. The intervals will be significantly longer than those in the table and are indicated on the Maintenance Check Sheet.

Repeat sequence from the first B Service		

Routine services

Arduous driving conditions

When a vehicle is used in arduous conditions, more frequent attention must be paid to servicing requirements. Even **daily** attention may be necessary to ensure the continued safe and reliable operation of the vehicle.

Failure to adhere to the recommended service schedules may result in premature engine wear or damage.

Some markets may have unique service requirements. Check with your Dealer/Authorised Repairer or Importer.

Arduous driving conditions include:

- Frequent driving in dusty and/or sandy conditions.
- Frequent driving on rough and/or muddy road surfaces.
- Frequent driving in countries with high ambient temperatures above 50°C.
- Frequent driving in severe cold weather below -40°C.
- Frequent driving in mountainous conditions.
- Frequent trailer towing.
- Driving in areas using road salt or other corrosive materials.

Oil Service is recommended for vehicles operated in arduous driving conditions.

Service Record stamps

The Service Record pages provide a record of the routine services carried out on your vehicle.

The information is important and could affect your warranty entitlement. Always make sure that the appropriate record slip is stamped and signed on completion of each service.

REPLACEMENT SERVICE PORTFOLIO

When the final service record entry has been completed, you can order a Replacement Service Portfolio via the Internet at:-

<http://gtr.spgrouponline.co.uk/>

or from a Jaguar Dealer/Authorised Repairer.

This will enable you to continue keeping an accurate record of your vehicle's service history. An accurate and verified service history will be useful if you want to sell the vehicle.

The Replacement Service Portfolio is visibly different to the original Service Portfolio. The front cover and title page have the revised title and text on page 2 explains why the replacement version is being used. Each internal page displays the caption 'REPLACEMENT'.

Original style Service Portfolio books are not available for purchase. This is a measure taken to counteract fraudulent attempts to recreate a vehicle service history.

Remember to transfer the details recorded on the Vehicle Details page, to your Replacement Service Portfolio.
