

SAFETY PRECAUTIONS

DANGER

Do not smoke, use an open flame, or cause sparks while refueling. The resulting fire and/or explosion may cause serious injury or death.

WARNING

Avoid exposing the fuel gases to any potential sources of ignition, as the resulting fire and explosion may cause serious injuries and/or death.

WARNING

Switch off the engine when refueling, as it is both a source of extreme temperatures, and electrical sparks. Failure to do so may cause a fire or explosion.

WARNING

Switch off any personal electronic devices, such as cell phones or music players, when refueling. They have the potential to trigger an explosion or a fire.

WARNING

Do not overfill the fuel tank. Overfilling may cause spillage when the vehicle is driven. Spillage may also occur if the fuel expands in high ambient temperatures.

NOTICE

Do not use leaded fuels, lead substitutes, or fuel additives.

NOTICE

Fuel system cleaning agents should not be used, unless approved by Jaguar. Unapproved products may be harmful to fuel system components on your vehicle.

NOTICE

Only use high quality fuel. Using lower quality fuels can damage the engine, fuel, and emission control systems.

GASOLINE ENGINED VEHICLES

NOTICE

Fuel system cleaning agents should not be used, unless approved by Jaguar Land Rover Limited. Unapproved products may be harmful to fuel system components on your vehicle.

OCTANE RATING

Note: *Federal law requires that gasoline octane ratings be posted on the pumps.*

Jaguar Land Rover recommends the use of premium unleaded gasoline with a minimum octane rating of 91 AKI (Anti-Knock Index) to contribute to increased performance, fuel economy and driveability.

If premium unleaded fuel is not available, you may use unleaded fuel with a lower octane rating, down to a minimum of 87 AKI, but this may reduce engine performance, increase fuel consumption, cause audible engine 'knock' and other driveability problems.

Note: *Do not use fuels with an octane rating lower than 87 AKI as severe engine damage may occur.*

If a heavy persistent engine knock is detected, even when using fuel to the recommended octane rating, or if you hear engine knock while holding a steady speed on level roads, consult your Dealer/Authorized Repairer to have the problem corrected. Failure to do so is misuse of the vehicle, for which Jaguar Land Rover Limited is not responsible.

Note: *An occasional light engine knock when accelerating or climbing hills is acceptable.*
