Tire pressure monitoring system (TPMS)

RECOMMENDED TIRE PRESSURE LOOK-UP

The Instrument panel can be used to display the recommended cold tire pressures for your vehicle. The tire pressure look-up table can be accessed via the **Vehicle Information** and the **Tyre Information** menus.

For more information, see 42, INSTRUMENT PANEL MENU.

Depending on the specification of your vehicle, a number of different values may be displayed to reflect different driving conditions, for example, high speed driving or for a heavily laden vehicle.

AWARNING

The tire pressures displayed in the Instrument panel will not be valid if non-approved Jaguar wheels or tires are fitted to your vehicle.

TEMPORARY USE SPARE WHEEL AND TIRE CHANGE

If the temporary-use spare wheel is fitted, the system will automatically recognize the change in wheel positions. After approximately 10 minutes of driving above 18 mph (25 km/h), the message **FRONT[REAR] RIGHT[LEFT] TIRE PRESSURE NOT MONITORED** will be displayed, accompanied by illumination of the warning lamp.

The warning lamp will first flash and then illuminate continuously. Extended use of the temporary-use spare wheel will trigger the message TIRE PRESSURE MONITORING SYSTEM FAULT.

This TPMS display sequence will be activated at every ignition cycle until the temporary-use spare wheel is replaced by a full size road wheel with a TPMS sensor fitted.

Note: If in use, always replace the temporary spare wheel before having a TPMS fault investigated.

TYPE APPROVAL NUMBERS

United States of America

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Canada

This device complies with Industry Canada Standard IC - RSS-210: Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Note: Changes or modifications, not expressly approved by the manufacturer, could void the user's authority to use the equipment.

The TPMS Radio Frequency (RF) approval numbers for the USA and Canada are:

USA FCC ID:	KR5S120123
	KR5S180052021
	5WK49097
Canada IC:	267T-S120123
	7812D-S180020A
	267T-5WK49097
