

TIRE REPAIR KIT SAFETY INFORMATION

⚠ WARNING

To prevent serious injury or death, take the following safety precautions:

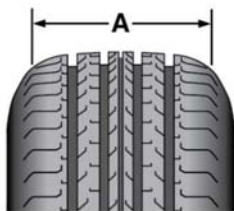

WARNING: If you have a flat tire while driving, do not initiate any sharp or abrupt steering and/or braking maneuvers. Let the vehicle slow down as much as is safely possible while leaving the roadway.

WARNING: Before exiting the vehicle, always make sure that the gear selector is in the Park (P) position, the engine is off, the Parking brake is applied and the Smart key is removed from the vehicle. Turn on the hazard warning lamps.

WARNING: Do not use the tire repair kit if the tire has been damaged by driving while seriously under-inflated or flat. Re-inflating a tire after it has been driven severely under-inflated or flat may cause a blowout and a serious crash.

WARNING: Do not use the tire repair kit if the tire is separated from the wheel, has damaged sidewalls, or a large puncture.

WARNING: Only use the tire repair kit to seal damage located within the tire tread area and to seal punctures less than 1/4 inch (6mm) diameter.

USING THE TIRE REPAIR KIT

⚠ WARNING

To prevent serious injury or death, take the following safety precautions when using the tire repair kit:

WARNING: Only use the tire repair kit within the -22°F to 158°F (-30°C to +70°C) temperature range.

WARNING: Never start the engine and leave it running when the vehicle is in an enclosed space. Exhaust gases are poisonous and cause unconsciousness and death if inhaled.

WARNING: If the tire inflation pressure does not reach 26 psi (1.8 bar, 180 kPa) within 7 minutes, the tire may have suffered excessive damage. A temporary repair will not be possible, and the vehicle should NOT be driven until the tire has been replaced.

WARNING: Only use the tire repair kit for the vehicle with which it was supplied, and do not use the tire repair kit for any other purpose than a tire repair.

WARNING: Never leave the tire repair kit unattended, when in use.

WARNING: Always keep children and animals at a safe distance from the tire repair kit, when in use.

⚠ CAUTION

Avoid skin contact with the sealant which contains natural rubber latex and could cause skin irritation.

NOTICE

Do not attempt to remove foreign objects, such as nails, screws, etc., from the tire.
