

Fluid level checks

NOTICE

Only use approved washer fluid.

NOTICE

Take care to avoid spillage, particularly if an undiluted or high concentration is being used. If spillage occurs, wash the affected area immediately with clean water.

The washer reservoir supplies the windshield and headlamp washer jets.

The Message center will display a message when the washer bottle requires more fluid. See **41, INSTRUMENT PANEL**.

Operate the washers periodically to check that the nozzles are clear and properly directed.

TOPPING UP THE WASHER FLUID

Note: *National or local regulations may restrict the use of Volatile Organic Compounds (VOCs) which are commonly used as antifreeze agents in washer fluid. A washer fluid with limited VOC content should be used only if it provides adequate freeze resistance for all climates in which the vehicle is operated.*

1. Clean the filler cap before opening, to prevent dirt from entering the reservoir.
2. Open the filler cap.
3. Top up the reservoir with the specified washer fluid until the fluid is visible in the filler neck, see **217, LUBRICANTS AND FLUIDS**.
4. Close the filler cap.
