Portable media

You can connect multiple devices simultaneously to the portable media interface and switch between them using the Touch screen. Select **iPod**, **USB**, **Bluetooth**, or **AUX**, to switch between modes.

The device docked first will remain the active device until you choose to change.

If, after changing to the newly-docked device, you change back to the first device, play will resume at the point you left it (USB and iPod only).

Note: You cannot use a USB hub to connect more than one USB device to the audio unit.

Note: Devices connected to the iPod and USB ports will be charged, but devices that are fully discharged will not play.

Note: Options, such as **Repeat** and **Shuffle**, relate to the device currently playing; they will not apply to any subsequent device.
