

PARKING AID SYSTEM FAULT

If a system fault is detected, a long high-pitched tone will sound and the switch indicator will flash. Also a graphic and the message **Parking Aid is not available. Please consult your dealer** will be displayed on the Touch screen. Contact a Dealer/Authorised Repairer as soon as possible.

REAR CAMERA

It remains the driver's responsibility to detect obstacles and estimate the vehicle's distance from them when reversing.

Some overhanging objects or barriers which could cause damage to the vehicle, may not be detected by the camera.

E161382

The Rear camera is located on the luggage compartment lid.

Note: Make sure that this area is kept clean and free from obstructions, for example, stickers, debris, mud, snow, ice, etc.

When Reverse (R) gear is selected, the Touch screen will automatically display a wide-angle, colour image from the rear of your vehicle.

Note: Vehicles with a Surround camera system can also split the screen's rear view image, to also display a 360° view. See **124, SURROUND CAMERA SYSTEM**.

The Rear camera provides a rear-view image to assist in reversing the vehicle. Overlaid on the image are reversing guidelines.

Note: The Rear camera display has priority over the Parking aids display. To cancel the Rear camera display at any time, push the **Home** menu button or touch the back soft key.

E164947

1. Dotted line: The safe working width of the vehicle (including the exterior mirrors).
2. Solid line: The projected path, based on the current steering wheel position.
3. Parking sensor activation: A coloured area appears, to indicate which rear sensor(s) has been activated.
4. Luggage compartment lid access guidance line: Do not reverse beyond this point if access is required to the luggage compartment.

To adjust the Rear camera settings while in **R**, touch anywhere on the Touch screen to display the user options.

Note: The user options menu/icon selection will differ for vehicles with/without a Surround camera system.
