

## TOWING WEIGHTS

 **Vehicles supplied with a 3.0L petrol engine, will not facilitate towing.**

See **249, WEIGHTS**, for details of the Gross Vehicle Weight (GVW), axle weights, and the load in the vehicle's luggage compartment.

**Note:** *The trailer's nose weight should also be considered when calculating the GVW.*

**Europe only:** When towing, the maximum permissible GVW can be increased by a maximum of 100 kg (220 lb), provided that the road speed is limited to 100 km/h (62 mph) or less.

**Note:** *When calculating the rear axle loading, remember that the trailer's nose weight, the load in the vehicle's luggage compartment, the weight on a roof rack, and the weight of the rear seat passengers must all be added together.*
