EMERGENCY LOCKING

E166027

In the event of the battery discharging, or a fault with the Keyless locking system, each of the doors must be locked manually.

The emergency key blade is required for this procedure. See **6**, **UNLOCKING THE VEHICLE**.

Note: Do not leave the emergency key blade in the vehicle at any point during the emergency locking procedure.

- Open a door and locate the emergency lock access cover. Using the emergency key blade, rotate the cover counter-clockwise to release and then pull to remove it from the door.
- Insert the emergency key blade firmly into the emergency lock.
 The emergency key blade can now be removed.
- 3. Refit the emergency lock access cover and rotate it clockwise to secure it firmly.
- Close the door and check that it is locked. Repeat the procedure for all other unlocked doors.
