- Wipe off fine dust from the seat surfaces using a clean, damp, non-coloured cloth. Change frequently to a clean area of cloth, to avoid abrasive action on the leather surface. Avoid over-wetting.
- If this is not sufficient, use a cloth which has been dampened with warm, soapy water and then wrung out. Use only mild non-caustic soap.
- Use Jaguar approved Leather Cleaner for heavily soiled areas. Dry off and rub with a clean, soft cloth, changing surfaces regularly.

Use Jaguar approved Leather Cleaner several times a year to maintain its appearance and suppleness. The cleaner will nourish and moisturise, and help to improve the surface's protective film against dust and substances.

- Do not use solvents. Do not use detergents, furniture polish, or household cleaners. While these products may initially give impressive results, their use will lead to rapid deterioration of the leather and will invalidate the warranty. Jaguar recommend a basic set of products that have been specially selected for the type of leather in your vehicle.
- Dark clothing may stain leather seats, just like other upholstery products.
- Sharp objects, such as belts, zip fasteners, rivets, etc., can leave permanent scratches and scratch marks on the leather surface.
- Unless spillages, such as tea, coffee, or ink, are washed away immediately, permanent staining may have to be accepted.

If a valet service is used, make sure that the specialist concerned is aware of, and follows, these instructions precisely.

REMOVING STAINS

Most stains on woollen fabric can be removed if treatment is carried out immediately, before the stain has a chance to dry-in.

Most stains can be treated with one of three cleaning fluids: Jaguar Upholstery Cleaner, dry cleaning fluid, or clean water. Follow the instructions on the package.

SEAT BELTS

Do not allow any water, cleaning products, or fabric from cloths to enter the seat belt mechanism. Any substance which enters the mechanism may affect the performance of the seat belt in an impact.

Extend the seat belts fully, then use warm water and a non-detergent soap to clean. Allow the seat belts to dry naturally while fully extended and do not allow the belts to retract until fully dry.

Note: *While cleaning the seat belt, take the opportunity to examine the webbing for damage and wear. Any wear or damage should be reported to, and rectified by your Retailer/ Authorised Repairer.*

AIRBAG MODULE COVERS

Airbag covers should only be cleaned using a slightly dampened cloth, and a small amount of upholstery cleaner.

Any substance which enters the mechanism, can prevent correct deployment of an airbag during an impact.

CARPET AND MATS

Marks or stains can be removed by gentle scrubbing with a weak solution of soap and warm water.
