

# Front seats

- Press the bottom of the button to lower.
  - Press the front of the button to inflate.
  - Press the rear of the button to deflate.
4. Seatback angle adjustment.
  5. Height adjustment.
  6. Forward and rearward adjustment.
  7. Cushion front tilt adjustment.

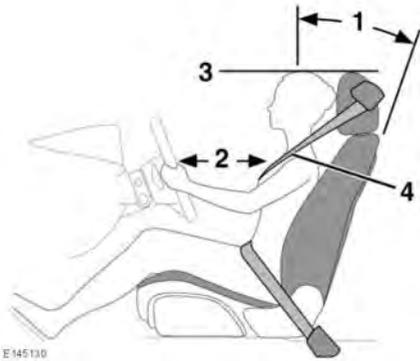

To adjust the seats, the Smart key must be in the vehicle and the ignition switched on.

If an obstruction is encountered while the seat is in motion, the seat will stop moving and further movement will be restricted until reset.

To reset the seat:

1. Remove the obstruction.
2. Adjust the seat to the point where the movement was restricted.
3. Press and hold the switch for at least 2 seconds to override the restriction.

## SITTING IN THE CORRECT POSITION

E145130

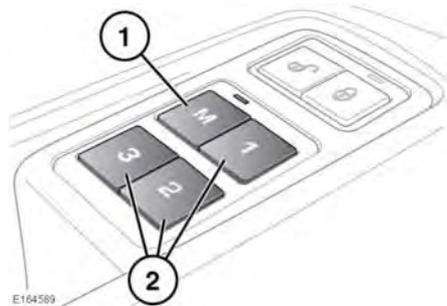

-  **The driver and front seat passenger must not ride with the seat fully reclined.**
-  **Do not adjust the seat while the vehicle is moving.**

The seat, head restraint, seat belt and airbags, all contribute to the protection of the user. Correct use of these components will give you greater protection. Therefore, you should always observe the following points:

1. Sit in an upright position, with the base of your spine as far back as possible. To achieve optimum benefit of the seat belt in the event of an accident, do not recline the seat excessively.
2. Do not move the driver's seat too close to the steering wheel. Ideally, a minimum distance of 254 mm is recommended between the breastbone and the steering wheel airbag cover. Hold the steering wheel in the correct position, with your arms slightly bent.
3. Adjust the head restraint so that the top of the head restraint is above the centre line of the head.
4. Position the seat belt so that it is midway between your neck and your shoulder. Fit the strap tightly across your hips; not across your stomach.

Make sure that your driving position is comfortable and enables you to maintain full control of the vehicle.

## DRIVING POSITION MEMORY
