

These data can help provide a better understanding of the circumstances in which crashes and injuries occur.

**Note:** *EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.*

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

## **South Korea only**

Please be advised that this vehicle incorporates an Event Data Recorder (EDR).

An EDR stores driving information at the moment of accident (driving speed, application of brake pedal and accelerator control etc.), and enables to confirm the information stored.

EDR information helps understanding the circumstances of accident more clearly.

## **SERVICE DATA RECORDING**

Service data recorders in the vehicle are capable of collecting and storing diagnostic information about the vehicle. This potentially includes information about the performance or status of various systems and modules in the vehicle, such as engine, throttle, steering, or brakes.

In order to properly diagnose and service the vehicle, a Retailer/Authorised Repairer may access the vehicle's diagnostic information, through a direct connection to the vehicle.
