

Wipers and washers

DRIP WIPE

If the Drip wipe function is configured, the wipers will operate a few seconds after a wash/wipe cycle has finished, to clear any remaining drips from the windscreen.

This function can be enabled/disabled by a Retailer/Authorised Repairer.

HEADLAMP WASHERS

The headlamp power wash operates automatically with the windscreen wash and will operate only if the headlamps are switched on and there is sufficient washer fluid in the reservoir.

Headlamp wash operates every fourth operation of the screen washers, provided the headlamps are still switched on and approximately 10 minutes have elapsed since the last headlamp wash.

Switching the headlamps or the ignition off and back on again, will reset the cycle. See **56, LIGHTING CONTROL**, or **102, SWITCHING OFF THE ENGINE**.

Note: *The headlamps are washed alternately, to prevent the washer fluid from reducing the light output from both headlamps simultaneously.*
