

Note: *It is advisable to have the engine running while resetting the windows, to make sure that a minimum of 12 volts is available at all times.*

FIRE EXTINGUISHER

For certain markets, fire extinguishers are fitted to comply with local legislation. Please note it is the owner's responsibility to make sure the fire extinguisher is maintained in accordance with the manufacturer's instructions.

It is also the responsibility of the owner to make sure the pressure is at a suitable operating pressure as indicated on the pressure gauge. Use only Jaguar approved fire extinguishers.
