

## BLUETOOTH® INFORMATION

**Bluetooth®** is the name for short-range Radio Frequency (RF) technology that allows electronic devices to communicate wirelessly with each other.

**Note:** *The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc and any use of such marks by Jaguar Land Rover Limited is under licence.*

The Jaguar **Bluetooth** wireless technology system supports **Bluetooth®** Hands-Free Profile (HFP), Advanced Audio Distribution Profile (A2DP), Audio Video Remote Control Profile (AVRCP) and Message Access Profile (MAP).

**Note:** *HFP and A2DP/AVRCP profiles can be connected independently, so a phone can be connected via one, while a media device can be connected via the other, at the same time.*

Before making use of the vehicle's **Bluetooth** wireless technology phone system, your **Bluetooth** wireless technology device must be paired and connected to the vehicle's system. This is done using one of two methods; via your phone to the vehicle (preferred method) or from the Touch screen to your phone. If one of these methods is not successful, try the other option.

Each time the ignition is switched on, the vehicle's system attempts to connect with the last connected phone.

As phones have a wide range of audio and echo characteristics, it may take a few seconds for the vehicle's system to adapt and deliver optimum audio performance. To achieve this, it may be necessary to reduce the media sound volume and also reduce the ventilation fan speed slightly.

## TELEPHONE COMPATIBILITY

For a list of compatible **Bluetooth®** wireless technology devices, please access the Jaguar website at: [www.jaguar.com](http://www.jaguar.com). In the **Owners** section, refer to **Bluetooth Connectivity**.

**Note:** *The Bluetooth wireless technology devices listed, have been tested for compatibility with Jaguar vehicles. Performance varies, based on the phone's software version, battery condition, coverage, and your network provider. Phones are warranted by their manufacturer, not Jaguar Land Rover Limited.*

## PAIRING AND CONNECTING A BLUETOOTH® PHONE OR DEVICE

A paired phone or device can be connected for different uses; phone or music. Pairing is normally required only once.

When the ignition is switched on, the vehicle automatically tries to re-connect to a previously paired **Bluetooth®** phone or device, if it is within range of the vehicle.

If automatic connection is not made, or to connect a new phone or device, use one of the following pairing methods:
