

CHILD SAFETY LOCKS

E165429

If children are to be carried in the rear seat positions, it is recommended that the rear door interior handles are disabled.

Press the button on the driver's door, to activate the child door locks and to also inhibit the rear windows. The button's LED indicator lamp will illuminate when active and a confirmation message will also be displayed in the Message centre.

To deactivate, press the button again. The LED lamp will extinguish and a confirmation message will also be displayed in the Message centre.

CHILD SEATS

 For optimum safety, children should travel in the rear of the vehicle at all times; front passenger seat travel is not recommended. However, if it is essential that a child travels in the front (not permitted in Australia), set the vehicle seat fully rearward and seat the child in an approved forward-facing child seat. Do not use a rearward-facing child seat - an inflating airbag could impact with the seat and cause serious injury.

Do not use a forward-facing child seat until the child using it is above the minimum weight of 9 kg and able to sit up unaided. Up to the age of two, a child's spine and neck are not sufficiently developed to avoid injury in a frontal impact.

Do not allow a baby or infant to be held or carried on the lap. The force of a crash can increase effective body weight by as much as thirty times, making it impossible to hold onto the child. At all times, children should be restrained in age and size appropriate child seats to reduce the risk of death or serious injury in a crash.

Children could be endangered in a crash if their child restraints are not properly secured in the vehicle. Always follow the instructions that accompany the child seat carefully.

Children typically require the use of a booster seat appropriate to their age and size, thereby enabling the seat belts to be properly fitted, reducing the risk of injury in a crash. Children could be endangered in a crash if their child restraints are not properly secured in the vehicle.

Do not use a child seat that hooks over the seatback. This type of seat cannot be satisfactorily secured and is unlikely to be safe for your child.

The seat belts fitted to your vehicle are designed for adults and larger children. For their safety, it is very important for all infants and children under 12 years of age to be restrained in a suitable child safety seat appropriate to their age and size.
