

## FUSE BOX LOCATIONS

E176659

### NOTICE

*When a fuse box lid is removed, take care to protect the box from moisture and refit the lid at the earliest opportunity.*

There are 5 separate fuse boxes fitted to the vehicle, each one containing fuses protecting a different group of circuits.

#### 1. Engine compartment front fuse box.

- Lift up the positive booster terminal cover. Press and hold the fuse box cover retaining clips and then lift to open the cover.

#### 2. Engine compartment rear fuse box.

- Remove the under hood cover by lightly pressing and holding the retaining clip, then lift to release and pull to remove. See **185, UNDER HOOD COVERS - REMOVAL**.

Press and hold the fuse box covers retaining clip, then lift and pull to remove.

#### 3. Passenger compartment fuse box, located on the right-side 'A' post, below the facia.

- Use a suitable tool to unclip the rearward edge of the panel to release and then pull to remove.

**Note:** Note the orientation of the panel to aid refitting.

#### 4. Luggage compartment lower fuse box.

- The fuse box is accessed by removing the right-side luggage compartment access panel. Turn the retaining lug 90 degrees counter-clockwise, to release and remove the access panel.

**Note:** This fuse box also houses spare fuses and the vehicle's fuse removal tool.

## 5. Luggage compartment upper fuse box.

- The fuse box is accessed by removing the right-side luggage compartment access panel. Turn the retaining lug 90 degrees counter-clockwise to release and remove the access panel.

## CHANGING A FUSE

### NOTICE

Always switch off the ignition system and the affected electrical circuit, before replacing a fuse.

### NOTICE

Only fit Jaguar approved replacement fuses of the same rating and type, or fuses of a matching specification.

### NOTICE

If the replacement fuse blows after installation, the system should be checked by a Retailer/Authorized Repairer.

**Note:** It is recommended that only qualified personnel should remove or replace relays.

The vehicle's fuse removal tool and some spare fuses, are located in the luggage compartment lower fuse box.
